# SP Think — Public order & monitoring assessment

## 01. Bottom line for SP

Monitor and prepare — do not over-securitise civic criticism of textbooks / Education Minister. Majority tone is neutral-news (67%). Negative share is 22% (41 posts). Primary public-order risk sits in bandh windows (30 Sep observed; 8 Oct called). Facebook is the lead monitoring channel (52%). Treat NH/road-block clips as traffic watch points requiring ground verification, not as proof of statewide unrest from this corpus alone.

## Recommended actions & desk metrics

### 04. Recommended actions

**1. Bandh readiness matrix**

Traffic plan, reserve, protest sites, hospital/exam access for 30 Sep pattern and 8 Oct call.

**2. Social listening SOP**

Daily: posts, negative %, bandh hits, road-block mentions; escalate if negative >30% or NH blockade videos trend.

**3. Narrative hygiene**

Acknowledge textbook grievance as civic; enforce against illegal obstruction separately.

**4. Evidence discipline**

Cite monitored posts only; do not equate keyword discourse with organisational command unless named.
