PEAK DAY VOLUME

01. SITUATION SNAPSHOT (SP VIEW)

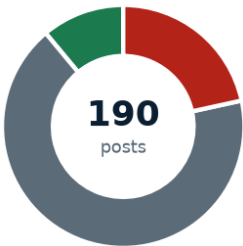

A multi-platform campaign around textbook errors and the Education Minister (Nityananda Gond) is active across Odisha. Volume is majority neutral/news (67%), with a meaningful critical share (22% / 41 posts). A 12-hour statewide bandh (30 Sep) and a further bandh call (8 Oct, INDIA bloc / political organisations) are visible in evidence. Road block / NH disruption reports (e.g. Chandikhol) appear in a minority of posts — treat as traffic and law-and-order watch points, not confirmed statewide unrest from this corpus alone.

02. ANALYTICS DASHBOARD

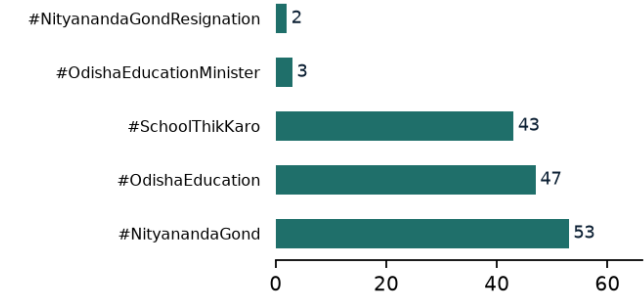

Posts by platform

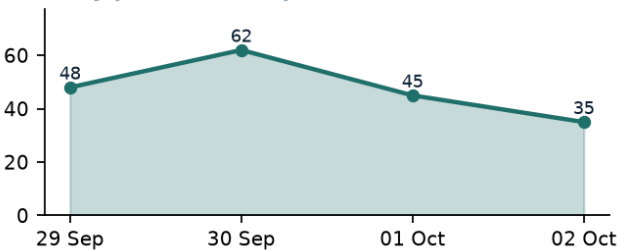

Sentiment mix

Keyword mention volume

Daily post volume (publication date)

Public order risk (current corpus) 3. WHAT THIS MEANS FOR DISTRICT / STATE POLICE

Overall tone is news-heavy, not violence-driven. Critical posts are mostly policy/minister accountability and textbook quality. Bandh days raise short-window risk of road obstruction, market closure pressure, and local flashpoints near Vidhan Sabha / NH junctions. No evidence here of organised communal or terror framing.

What to watch next 48–72 hrs

1) 8 Oct bandh call amplification vs actual turnout signals. 2) NH / Chandikhol-style blockade clips spreading. 3) Student/exam disruption narratives (SSC date change talk on Reddit). 4) Sudden spike in negative % above ~30%.

Information posture

Facebook carries majority volume (52%) — district social media cells should prioritise FB pages/local news handles. Reddit is second (32%) but often exam/student discussion, not street mobilisation. X is smaller but faster for rumour.

Actionable for SP

Pre-brief traffic & city police for bandh windows; map prior chowk/NH pinch points from open video evidence. Separate peaceful criticism of education policy from illegal obstruction. Keep a single district sitrep: volume, negative %, bandh mentions, road-block mentions, locations named. Do not treat keyword-matched discourse as confirmed CJP organisational strength without named attribution.

04. KEY FINDINGS (EVIDENCE-GROUNDED)

- 01 Bandh / protest activity: 12-hour Odisha bandh reported 30 Sep; multiple posts cite NNKS / student outfits; 5+ posts name bandh explicitly.
- 02 Critical share: 41/190 posts (22%) negative; ~9 target the Education Minister directly in cited sample.
- 03 Issue cluster: textbook errors (~22 posts) dominate grievance language; school infrastructure appears in a smaller set.
- 04 Platform concentration: Facebook 98 · Reddit 60 · X 29 · YouTube 3 — lead channel for monitoring is Facebook.
- 05 Keyword spine: #NityanandaGond (53), #OdishaEducation (47), #SchoolThikKaro (43) drive mention volume.

05. RECOMMENDED ACTIONS (SP)

1. Maintain bandh readiness matrix

District-wise: traffic plan, reserve, known protest sites, hospital/exam centre access routes for 30 Sep pattern and 8 Oct call.

2. Social listening SOP

Track daily: total posts, negative %, bandh keyword hits, road-block mentions; escalate if negative share >30% or NH b lockade videos trend.

3. Narrative hygiene

Public communication: acknowledge textbook grievance as civic issue; enforce against illegal obstruction separately.

4. Evidence discipline

Cite only monitored posts; avoid equating keyword discourse with organisational command structure unless named.

06. CONTROL DASHBOARD (KEEP ON SP DESK)

Metric	Value	SP threshold / note
Posts in window	190	Re-pull if +20% new overnight
Negative share	22% (41)	Watch if crosses ~30%
Lead platform	Facebook 52%	Prioritise FB local pages
Bandh mentions (sample)	>=5 posts	Map to geography / timing
Engagement	3,961	High reach is not high threat
Peak day	30 Sep · 62 posts	Align with bandh day
Next political date	8 Oct bandh call	Pre-brief / traffic plan

07. BOTTOM LINE FOR SP

Monitor and prepare — do not over-securitise civic criticism of textbooks/minister. Treat bandh windows as the primary public-order risk period. Keep Facebook-first monitoring, track negative share and blockade content, and pre-position traffic/law-and-order plans for 8 Oct if mobilisation continues. This brief uses the same 190-post monitored corpus as the Event Summary report; regenerate if volume or tone shifts materially.

Classification

For official use — Odisha Police / Blura Saga monitoring product.

Analytics derived from event posts 29 Sep–02 Oct 2026. Not a substitute for ground verification.

Addressed for SP / operations desk use. Full evidence tables remain in the long Event Summary export.
